hosand GT.a

The only heart rate telemetry system also available for water sports.

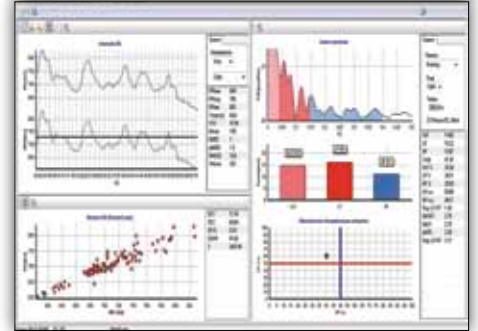

Hosand GT.a is the only heart rate monitoring system to let you watch up to 32 athletes, in real time, both in water and outside, when training in real situations or in fitness tests.

Thanks to hosand GT.a features, you will have the possibility to assess the whole team at once, with any test you could think of, saving time in both heart rate tracing and data analysis, creating your own customised test protocols and mixing statistical data with flexibility and accuracy. You will then have the opportunity to repeat tests more often and monitor the fitness condition more accurately.

The system features full statistical analysis tools, rest analysis, regression analysis, lactate-HR mixed analysis, either individual or group historical data analysis and the new frontier: heart rate variability analysis. Let yourself get the best ever. Now it's here.

Player	HR	HR	HR	HR	HR	HR	HR	HR	HR
Player 1	120	130	140	150	160	170	180	190	200
Player 2	110	120	130	140	150	160	170	180	190
Player 3	100	110	120	130	140	150	160	170	180
Player 4	90	100	110	120	130	140	150	160	170
Player 5	80	90	100	110	120	130	140	150	160
